Some of many advantages of OceanRep:

- Quick information about your research output (for e.g. funding agencies, public relations)
- Free access to full text publications
- Export to your own lists of publications (websites, bibliography managers...)
- Easy full reference information for data import via DOI
- Increase the visibility and citation impact of publications
- RSS Feed compatible
- Individual listings of results: research divisions, author, year ...
- Quick & detailed information for annual reports

OceanRep is a digital archive containing the research output of IFM-GEOMAR. Included are journal articles, conference papers, book chapters, theses and more, with full text, if available. OceanRep is managed by the IFM-GEOMAR Library and was co-financed by the Kiel Cluster of Excellence „Future Ocean“. Expected to be online in May 2010.
