

Correction to “A model study of the vertically integrated transport variability through the Yucatan Channel: Role of Loop Current evolution and flow compensation around Cuba”

Yuehua Lin, Richard J. Greatbatch, and Jinyu Sheng

Received 8 February 2010; published 30 April 2010.

Citation: Lin, Y., R. J. Greatbatch, and J. Sheng (2010), Correction to “A model study of the vertically integrated transport variability through the Yucatan Channel: Role of Loop Current evolution and flow compensation around Cuba,” *J. Geophys. Res.*, 115, C04028, doi:10.1029/2010JC006176.

[1] In the paper “A model study of the vertically integrated transport variability through the Yucatan Channel: Role of Loop Current evolution and flow compensation around Cuba” by Lin et al. (*Journal of Geophysical Research*, 114, C08003, doi:10.1029/2008JC005199, 2009), in the last sentence of paragraph 31, the word “westward” in “drives enhanced westward” should be “eastward.”
