Corrigendum

Corrigendum to “Zircon U-Pb, geochemical and isotopic constraints on the age and origin of A- and I-type granites and gabbro-diorites from NW Iran” [Lithos, 374–375, 105688]

In the paper “Zircon U-Pb, geochemical and isotopic constraints on the age and origin of A- and I-type granites and gabbro-diorites from NW Iran” by Moghadam et al. (Lithos, 2020, 374–375, 105688) four references were inadvertently omitted in section 2 (Geological setting). Therefore, the sentence in paragraph 35–37 of section 2 should read as follows:

“Late Cretaceous magmatic rocks are also reported from the outermost UDMB (E of Marivan (e.g., (Azizi and Jahangiri, 2008)) and S Urumieh (e.g., (Ghalamghash et al., 2009a; Ghalamghash et al., 2009b)); Fig. 1A), whereas Eocene volcanic rocks are present along the Main Zagros Thrust (Shafaii Moghadam et al., 2020).”
