KIEL MARINE SCIENCES

„OceanRep“ – IFM-GEOMAR Repository EPrints replaces UnivIS-Publication database

... EPrints – from scientists for scientists

Some of many advantages of OceanRep:

Quick information about your research output (for e.g. funding agencies, public relations)

Free access to full text publications

Export to your own lists of publications (websites, bibliography managers...)

Easy full reference information for data import via DOI

Increase the visibility and citation impact of publications

Contact:
IFM-GEOMAR Library

The screenshot shows the OceanRep website with a navigation bar (NEWS, INSTITUTE, RESEARCH, TEACHING, DISCOVER) and a central area with the text "OceanRep IFM-GEOMAR Repository". A sidebar on the left contains search and browse options. A right sidebar lists various services like "Login for data input", "About us", "Statements", "Help", "FAQs", and "Statistics".

This screenshot shows a detailed view of a publication listing on the OceanRep website, including fields for title, author, and abstract, along with various filtering and sorting options.

This screenshot shows a detailed view of a single publication page on the OceanRep website, displaying the full text of the article and its associated metadata.

RSS Feed compatible

Additional features, e.g.:

Individual listings of results: research divisions, author, year ...

Quick & detailed information for annual reports
